02/03/2021 Events

Online High-Growth Technology Business Forum, organized by the European Patent Office (EPO) in common with LESI (Licensing Executive Society International), will take place on 25 February 2021.

During the event, world-class experts and visionary entrepreneurs will present the latest and most relevant information on high-growth technologies, case studies, practical solutions for managers and entrepreneurs. The expert panel also aims to take an in-depth look at the role of intellectual assets.

Why should you attend?

- Hear the stories of business decision-makers from other SMEs
- Find out about practical business issues on how to create value with intellectual assets
- Get a global perspective from our expert panel from three continents
- Ask questions and contribute to discussions

Who can attend?

- Business decision-makers in SMEs
- Advisors to high-growth technology businesses
- Investors in high-growth technology businesses
- Incubator staff members
- Professionals in the IP field
- Anyone interested in intellectual asset management

The format of the online conference will be dynamic and interactive. The event takes place three times a year, and its geographic focus rotates between Europe, Asia and North America. This first 2021 edition focuses on Europe.
