09/14/2015 Events

In the period 19-21 November 2015, in Brussels, Belgium, will be held the international exhibition of inventions, research and new technologies “Brussels Innova”. The organizers invite all those who want to promote their ideas, to demonstrate their innovative qualities or seeking new funding opportunities.

During the event, having already reached its 64th edition, will be presented innovations from various fields, such as engineering, medicine, environmental technology, etc. There will be organized conferences and debates with the participation of experts in the field. Also, various workshops will be held in the field for young people who want to begin or to become familiar with concepts such as invention, innovation, research and innovational business.

This year edition of the exhibition is announced to be extremely promising both for participants and visitors. “Brussels Innova-2015” will include 4000 m^2 of exhibition space, 20 countries represented, 4000 professional visitors, 300 innovations and press coverage that’s the envy of the world. An important part of the event will also be the Contest “Brussels Eureka”, presided over by a panel of national and international specialists. Experts will appreciate and reward the best innovations presented at the exhibition.

International exhibition “Brussels Innova”, in Belgian capital, has devoted its abilities over the years as a prestigious space of meeting between researchers, scientists, university teaching staff and entrepreneurs the most active and interested in everything that is innovation.
