Bibliographic Information Services

The national collection of documents in the field of intellectual property includes: databases (DB) with inventions on electronic support from different countries and international organizations; patents for invention, short-term patents for invention, new varieties of plants, trademarks, industrial designs of the Republic of Moldova; books and serial publications in the field of IP, etc.

The Collection is annually supplemented with new documents in different fields, which are reflected in the electronic Catalog and in specialized DBs.

Beneficiaries of the bibliographic information services in the field of IP are the experts and other employees of AGEPI, as well as all interested persons outside the institution: researchers, inventors and rationalizers, teaching staff, students, etc.

They benefit from:

- access to the national Collection of patents, patent applications, trademarks, utility models, new varieties of plants;
- informational assistance in support of their creativity;
- the possibility of using the electronic Catalog of the book collection (DB BOOKS) and that of the articles from the periodical editions in the field of intellectual property (DB ART-IP), as well as access to the electronic databases of AGEPI and offices abroad;
- methodological assistance in information retrieval in electronic DBs;
- information and bibliographic servicing;
- the opportunity to participate in information promotion activities in the field of IP carried out at local and republican level

Collection

The national Collection of documents in the field of intellectual property owned by AGEPI consists of the following types of documents:
