09/26/2016 Events

In the period 22-25 September 2016, IEC Moldexpo hosted the CONSTRUCT-HOME International Specialized Exhibition of Architectural Projects, Design Solutions, Building Materials, Technologies and Equipment for a Modern House, fifth edition, and International Specialized Exhibition of Technologies, Safety Means and Security, fifteenth edition.

State Agency on Intellectual Property (AGEPI) attended the event with an exhibition stand, by which were present several inventors in the field of construction. All inventions which were exhibited at the stand are patented with the AGEPI. This work demonstrates both the novelty of the works and the fact that the inventors realized the importance of protecting intellectual property, namely inventions, said AGEPI Director General, present at the inauguration ceremony of the event. Octavian Apostol added that AGEPI encourages inventors from all fields, including in the construction sector, to continue the work of creating new products and technologies that contribute to improving living conditions and daily life of people.

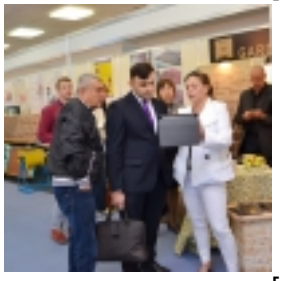

At the CONSTRUCT-HOME exhibition were presented products and services for individual construction and renovation, interior design and planning solutions. For the attention of visitors were exposed architectural projects; engineering and thermal systems; facades, windows, doors, automatic doors; finishing materials; design solutions; ceramics; sanitary and bathroom ware, etc.

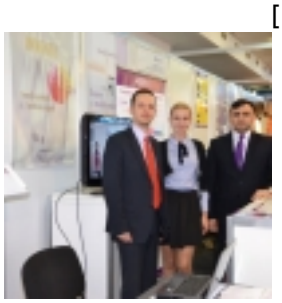

The business program of CONSTRUCT-HOME also included the exhibition-contest of architectural projects, the contest of innovative solutions in construction and security, and the Business Networking Event - a modern tool for establishing business contacts.

The SECURITY exhibition brought together manufacturers and suppliers of technologies and services in the field of security and guarding. Participants offered the consumers modernization solutions for security systems, increasing the efficiency of protection of natural persons, houses, offices, administrative objects.
